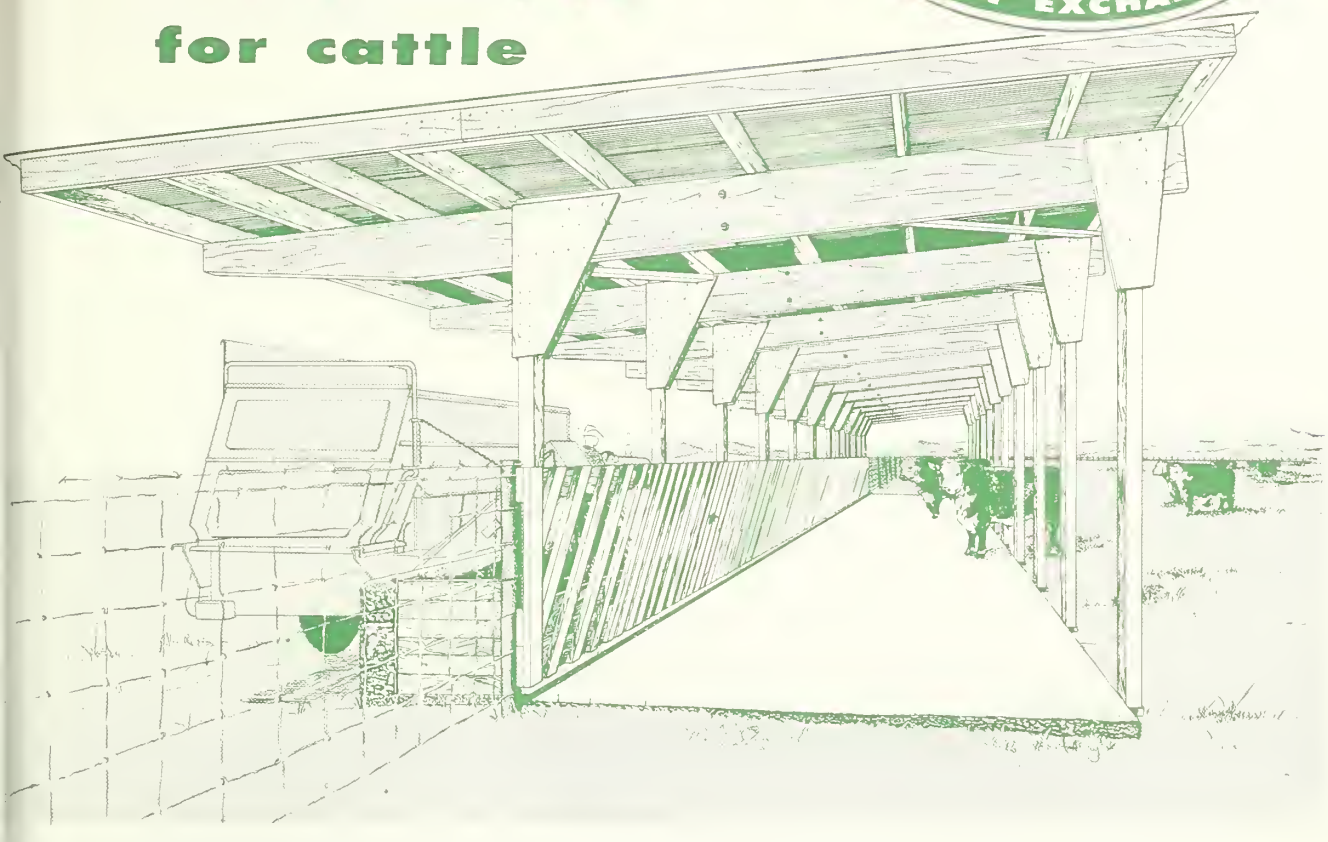
COOPERATIVE FARM BUILDING PLAN EXCHANGE

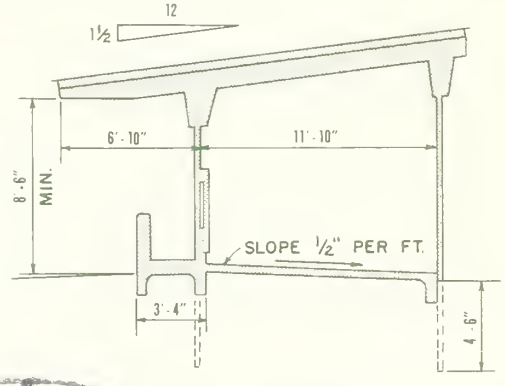
PLAN NO. 5854
(1 SHEET)

Fence-line FEEDER for cattle



This feeder is designed to be filled with a self-unloading wagon or truck. A lightweight metal roof protects the concrete manger and platform from sun and rain. The wood framing is supported by pressure-treated poles or square posts, spaced 10 feet center to center lengthwise of the platform.

This sturdy structure will withstand snow loads of 25 pounds per square foot and winds of 88 miles per hour.



SECTION

Complete working drawings may be obtained through your county agent or from the Extension agricultural engineer at most State agricultural colleges. There is usually a small charge.

ORDER PLAN NO. 5854, FENCE-LINE FEEDER FOR CATTLE

If working drawings of this plan are not available in your State, write to the U.S. Department of Agriculture, Agricultural Engineering Research Division, Plant Industry Station, Beltsville, Md. The U.S. Department of Agriculture does not distribute drawings, but will direct you to a State that does distribute them.
